

## 6 Blocks in an Hour

Janice Cronkright

Look what just two fat quarters of contrasting fabrics can do! Yes! You can make 6 blocks in an hour, IF YOU PRECUT BEFORE CLASS. If you don't, it will take you longer. We would suggest that you take the time to precut one pair of fat quarters. Once you've sewn up a set and know what you are doing, feel free to use the remainder of the class time to cut additional pairs of fat quarters to make more sets, whether for another project or to make this one larger. That way, you will maximize your instructional time with Janice, but could still get a larger quilt well started during class. You will have time to make several sets in this easy pattern, so you can choose whether to make a bigger project or not. Each set pair of fat quarters makes six 9" square blocks. This one is like popcorn, you just can't quit making them once you start!

### **Supply List:**

Your precut fabric. (See below)

Sewing machine and your BSS

Bring additional fat quarters and cutting supplies if you are going to make more than one set.

### **Before Class:**

Select two fat quarters with good contrast

Cut fabric before class, using EITHER of the cutting guides attached. (Cut both from same guide, though): Stack 2 fat quarters. Cut per guide of your choice. You may find it helpful to label your pieces. Watch layout lengths!

Bring cut pieces to class.

Bring additional fat quarters if you want to make more than one set of six 9" square blocks.
