

Sew Very Easy Door Pocket

Karen Spellman

This cute little pocket hangs on your door to help you remember things like keys, receipts, etc. Make one for every door in the house! Make one to put on the radio knob in your car! The places you'll find to use these will surprise you, so it's a good thing that every set of fabrics actually yields two pockets.

You will have plenty of time to make several sets of door pockets in class. OR, if you finish early, you might want to spend the rest of the time sewing in the charity area in the main room.

Supply list

You can reverse the 'inside' and 'outside' fabrics if you prefer not to have identical pockets, as each pair of squares yields two pouches.

Two 16 ½" fabric squares , one focus and one of contrasting fabric

1 16" square of Pellon 809 interfacing
